

## Current innovations and opportunities in forest management and productivity

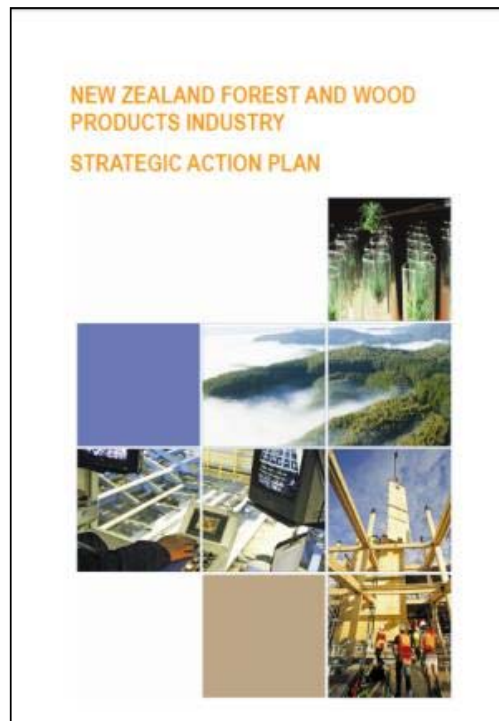

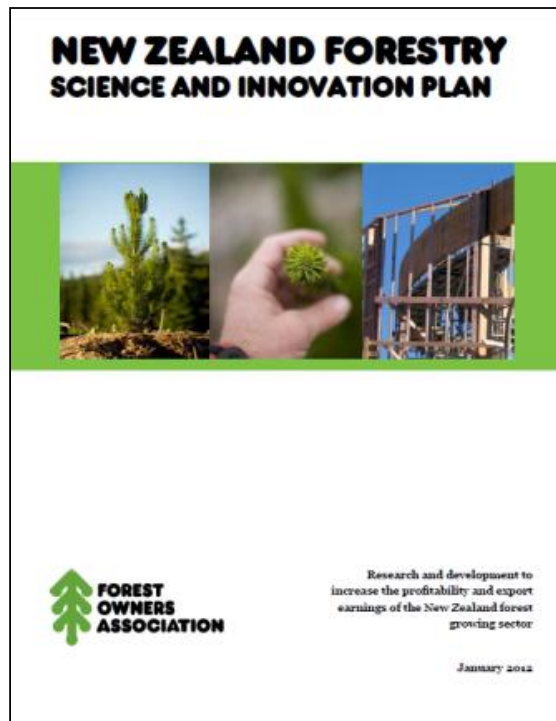

Peter Clinton 4<sup>th</sup> April 2018, Rotorua

# What did the future of forestry look like in New Zealand?

# What were the Drivers for the Programme?

# Reflections

54 months in to a 72 month programme

Value of long term research – e.g. LTSP & silvi breeds trials, etc.

Integrated research – spatial economics (FIF)

Ambition for change

Appetite for research

Future focus

# Today

- The PINEMAP story from the southern USA
- Future forests – pulling all the levers
- Right tree in the right place
- Full value of Forests
- Forest phenotyping
- What's under the canopy
- Health and resilience of forest soils
- Radiata pine water use
- New Accelerator trials
- Managing nursery soils
- Converting research into action
- Virtual wood and wood product performance
- New proposals and directions
